THE REPLY FILED 01 November 2006 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.							
1. The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:							
a) The period for reply expires 3 months from the mailing date							
b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Continuation of 11. does NOT place the application in condition for allowance because: the phrase "said first article and said second article are attached to form a rotatable body, which rotates about said axis of rotation" does not require both the first article and second article be part of the rotatable body. It only requires that they are attached to form a rotatable body. Applicant also argues that the presence of the locking pin prevents the draw bar from being remotely operated and thus makes the combination suggested by the examiner unobvious. The examiner respectfully disagrees. The locking pin could still be kept and used as a safety backup to the remote motor holding the hitch in place. The rotatation fo the hitch could still be accomplished by simply removing the pin prior to rotation.
